Protocols need better liquidity infrastructure.

LPs lose money in current pool designs. Billions in project token liquidity sits in these generic pools. Almost none of it is professionally managed.

49.5%

of LPs lose money versus simply holding their tokens
(2021, Topaze Blue, arXiv)

\$7B+

in project token liquidity sitting in generic, one-size-fits-all DEX pools
(April 2026, DefiLlama)

<2%

of that liquidity is professionally managed
(April 2026, DefiLlama)

➔ Pools should not be universal but built for protocols. *Alphix It!*

We build the pool and manage it.

Custom pool logic using Uniswap v4 Hooks paired with AI-driven agents that compound, rebalance, and maintain depth via delegation.

The Pool

Live

Dynamic Fees. Fees adjust in real-time to protect against toxic flow.

Rehypotheication. Idle capital earns lending yield between swaps.

Custom Components. Features tailored to protocols needs.

The Manager

● Q3 2026

Pro

01 Delegate. Single signature. Protocol keeps custody of liquidity while it is managed for them.

02 Configure. Protocol selects from strategies depending on goals and inventory.

03 Execute. Agent runs continuously to optimize position.

Simple and Secure. Easy onboarding. Non-custodial. Transparent.

Live and performing.

Our pools are growing and beating Uniswap benchmarks. Partners are showing interest.

Dynamic Fee

- 35% in additional fee capture
- Fees adapt in real-time to volume and volatility

Rehypotheccation

- 3x increase in APY
- Idle capital is lent out to Aave so LPs earn more

What sets us apart.

Protocols need deep, stable on-chain markets for their tokens. Today there are three options, all with tradeoffs.

Type		Offering	Tradeoff
Market Makers		Liquidity via token loads and retainers	Custodial, \$150-400k/yr
ALMs		Managed LP for token issuers	Funds in external contracts, 1% AUM + 50% of fees
DEX Liquidity		Deploy pools or bribe for emissions	Active LP management, mercenary liquidity

Alpha offers custom pool logic and non-custodial management of liquidity with AI. For just 5-25% on yield.

What we've achieved. What's next.

● Product ● Recognition

We're raising \$500K to develop Alphix Pro and roll out to 10 partners and \$15M in TVL by Q2 2027.
